

Michael Moschetti

HW 7

May 6, 2018

This homework assignment was difficult to get started in terms of working with the server. I had a lot of trouble connecting. This was fixed once I figured out how to use the provided jar file. Aside from that the homework assignment was not too time consuming. There were some issues with some of the provided XML files but those were easy to spot and fix. In the video I registered a user, send messages, show the settings page, and also provide the logs from the server side.

I pledge my honor that I have abided by the Stevens Honor System.
